Project "Trinational cooperation platform for sustainability initiatives, social work institutions and sustainability-oriented companies"

Aims at illuminating **sustainability-relevant potentials** through (**digital) cooperation** between sustainability initiatives, social work institutions and sustainability-oriented companies in the Upper-Rhine Area.

Overall RQ is: **What are interlinkages between social, environmental and economic sustainability that can be used by initiatives, institutions or companies/start-ups for cooperation?**

In cooperation with EH Freiburg, Germany:
Social work students work on related RQ, exchange with them
and eventually representatives from sustainability initiatives,
social work institutions and sustainability-oriented companies
is planned.

Research problem

How can potential forms of interdisciplinary cooperation between sustainability-related actors contribute to sustainable development in the upper rhine area?

Poster presentations
Master of Changing Society

Thank you very much for your participation!
